A

WORKSHOP

Rescue Training Institute

CPR/First Aid and Bloodborne Pathogens

CPR, AED and First Aid Our American Safety & Health Institute® (ASHI) CPR/AED and Basic First Aid training is a program that develops the basic knowledge, skills, and confidence to respond to an emergency. This training program is an excellent choice for both the community and workplace setting, and conforms to the 2020 AHA Guidelines Update for CPR, ECC, and First Aid. ASHI is branded under the Health & Safety Institute (HSI) family of programs.

This ASHI course offers:

- Low-stress training with user-friendly materials and positive coaching
- Safe and effective first aid response techniques based on the most up-to-date guidelines for CPR and first aid
- A memorable learning experience which will stay with the student long after the one-day training session
- Significant classroom time for hands-on practice in small groups
- Performance evaluation, all students must perform required skills competently without assistance.

Who should attend?

The intended audience is individuals who are not healthcare providers or professional **rescuers** who desire, or are occupationally required, to be trained and certified in First Aid, CPR & AED. Typical attendees: construction industry, community staff, emergency response teams, manufacturing plants.

Who Needs BBP training? OSHA states that any employee that has the potential for an occupation exposure is to be trained. Occupational exposure is defined as *"reasonably anticipated skin, eye, mucous membrane, or parenteral contact with blood or other potentially infectious materials that may result from the performance of an employee's duties."* A determination of the duties, tasks, and scope of the employees' work must be done by the employer to assess whether employees have reasonably anticipated exposure to blood or OPIM [29 CFR 1910.1030(c)(2)]

When and where?

July 22, 2025, Northern Region - Tracy, CA
July 23, 2025, Central Region – Madera, CA
July 24, 2025, Southern Region - Tulare, CA

August 2025

WORKSHOP

Colette Klier/ Sedgwick

Tabletop Breach Drill With AI

Participants will work collaboratively to real-world cyber incidents, analyze their incident response strategies, identify ways to further develop and innovate countermeasures, and enhance decision-making skills in the evolving landscape of AI-enabled cyber risks. With the sudden rise in Artificial Intelligence system(s) and other cyber-attacks against local governments in the U.S., proactively testing your incident response plan will place your organization more on the offense instead of the defense.

Learning Objectives:

- Objective 1: Understand current Artificial Intelligence-based cyber risk trends for public entities.
- Objective 2: Analyze and respond to dynamic cyber incidents where AI plays a central role.
- Objective 3: Enhance decision-making skills under pressure using scenario-based role playing.
- Objective 4: Identify vulnerabilities in current defense systems and develop countermeasures.
- Objective 5: Implement changes to processes to mitigate cyber losses and improve insurability.

Who should attend?

This workshop is intended for administrative and technical staff dealing with cyber risk scenarios or other employees who could benefit from cyber tabletop exercise techniques. Attendees are encouraged to bring their Incident Response Plan if they have one drafted. It is not a requirement.

When and where:

August 19, 2025, Northern Region – Lathrop, CA
August 20, 2025 Central Region – Reedley, CA
August 21, 2025 Southern Region – Tulare, CA

September 2025

D WORKSHOP

Adam Lopez/ Sedgwick

Root Cause Analysis (RCA) Training

This Root Cause Analysis (RCA) training course will teach participants how to identify the underlying “real” causes of injuries, leading to more effective corrective action and prevention of future injuries. It equips individuals with tools and techniques to do a deep dive, addressing the root causes to achieve lasting improvements.

Learning objectives:

- Understand the principles and process of Root Cause Analysis.
- Learn various Root Cause Analysis tools and techniques, such as the 5 WHY’s, body diagram, and the importance of fact gathering.
- Develop skills in defining inconsistencies, deficiencies, gathering data, analyzing causes, and implementing corrective actions.
- Understand the importance of Root Cause Analysis in various industries and regulatory environments.

Who should attend?

Any individual with safety responsibilities: safety supervisors, safety managers, safety coordinators, HR managers.

When and where?

September 16, 2025 ,Northern Region – Turlock, CA
September 17, 2025, Central Region – Kerman, CA
September 18, 2025, Southern Region – Tulare, CA

November 2025

A PUBLIC WORKS FORUM

Rock Miller/Consultant Civil
Engineer and Traffic Engineer

Crosswalk Liability

Marking of crosswalks can be popular and encourage walking. But they generate more than their fair share of claims for injured pedestrians. The presentation will focus upon liability and crosswalks. Issues to be addressed will include:

- Whether to mark or not.
- Marking practices.
- What to do beyond marking.
- What to do with existing installations.
- Preparing for a potential claim or lawsuit.
- What does the research say.

Who should attend?

Traffic engineering, Streets Dept (signs & markings), city attorney and risk management. Planning department staff that seeking more walkability.

When and where?

November 12, 2025, Central Region – Reedley, CA
November 13, 2025, Southern Region – Delano, CA
November 17, 2025, Northern Region – Tracy, CA

December 2025

B PUBLIC WORKS FORUM

EFI Global / Jason Nichols

Preparing Facilities for Winter Storms

This presentation, titled "Water Intrusion Prevention and Resiliency," explores the critical role of the building envelope in safeguarding structures against water-related damage. It emphasizes the importance of proactive design and maintenance strategies to enhance the durability and performance of buildings. The discussion begins with roof systems and will briefly touch on waterproofing systems, highlighting their function as the primary barrier against precipitation and detailing best practices such as proper drainage, material selection, and regular inspections. We will address fenestrations—windows, doors, and skylights—as common points of vulnerability, outlining methods for effective sealing, integration with weather-resistant barriers, and performance testing. Finally, it underscores the necessity of a holistic approach to building envelope integration, ensuring continuity across all components and validating performance through rigorous testing. The session concludes by reinforcing that water intrusion prevention is not merely about stopping leaks, but about fostering resilient, long-lasting structures that protect both property and occupants

Who should attend?

Public works and Maintenance/Operations

When and where?

December 9, 2025, Northern Region – Lathrop, CA

December 10, 2025, Central Region – Madera, CA

December 11, 2025, Southern Region – Lemoore, CA

January 2026

PUBLIC WORKS FORUM

Ignacio Barrios/Sedgwick

Traffic Flagging

This city-focused training course prepares municipal employees, contractors, and public works personnel to safely manage traffic flow in urban environments. Emphasizing compliance with local ordinances and state regulations, the course provides in class instruction in flagging operations and traffic control procedures essential for maintaining safety in city streets, intersections, and public works zones while encroaching onto the street.

Key Topics Covered:

- Traffic control fundamentals and regulations
- Reading and implementing municipal traffic control plans
- Safe flagging techniques in high-density and pedestrian-heavy areas
- Use of signage, barricades, and personal protective equipment (PPE)
- MUTCD compliance and local policy integration

Who should attend?

- City public works and transportation staff
- Utility and maintenance crews working on city infrastructure
- Contractors performing roadwork or construction in city limits
- Event coordinators managing traffic for parades, festivals, or emergencies

When and where?

January 13, 2026, Northern Region – Riverbank, CA
January 14, 2026, Central Region - Atwater, CA
January 15, 2026, Southern Region – Delano, CA

February 2026

E WORKSHOP

Kern CPR / Darren Amos

CPR/FIRST AID/BLOODBORNE PATHOGENS

HSI **CPR, AED and Basic First Aid** combination training allows instructors an easy option for students seeking a comprehensive training class.

The program helps develop basic first aid knowledge and skills, and the confidence to respond. **CPR, AED and Basic First Aid** combination training is an excellent choice for both the community and workplace setting, and conforms to the current AHA Guidelines Update for CPR and ECC, and the current AHA and ARC Guidelines Update for First Aid.

Who should attend?

Individuals who require or desire CPR, AED and first aid knowledge and skills:

- Emergency response teams in business and industry
- Non healthcare workers
- Needing to meet OSHA requirements
- Adult residential care personnel
- Teachers
- Parents
- Babysitters

When and where?

Wednesday, January 18, 2026 – Tulare, CA
Thursday, January 19, 2026 – Turlock, CA

March 2026

F WORKSHOP

Adam Lopez and Sarahi Vargas- Garcia,
Sedgwick Risk Consultants

Libraries/Homeless

Homelessness is a complex and growing challenge for cities across California. Especially when dealing with encampments, river bottoms, libraries, and other city buildings. This training provides city leaders, staff, and stakeholders with a comprehensive understanding of the root causes, impacts, and solutions to homelessness. Participants will explore the social, economic, and policy factors contributing to homelessness, learn best practices for prevention and intervention, and examine collaborative approaches that engage community partners, service providers, and residents.

Through real-world case studies, interactive discussions, and practical tools, this course equips attendees to:

- Understand the demographics and drivers of homelessness.
- Navigate legal and regulatory considerations affecting municipal responses.
- Develop strategies for balancing compassion with public safety and community concerns.
- Implement evidence-based programs and partnerships that reduce homelessness and improve outcomes.

Who should attend?

Any city staff member who encounters homeless individuals throughout the course of their work day. Public Works, Police Officers, Parks and Recreation. City managers, council members, public safety officials, housing and planning staff, and community engagement professionals.

When and where?

March 17, 2026 - Northern Region – Tracy, CA
March 18, 2026 - Central Region – Madera, CA
March 19, 2026 - Southern Region – Tulare, CA

April 2026

D WORKSHOP

Chester E. Walls, Esq.,
Joseph Ortega

Sidewalk Liability and Solutions

The Central San Joaquin Valley Risk Management Authority (CSJVRMA) is providing a training on sidewalk liability which will cover legal, claims, risk control, and repair issues associated with sidewalks. Some topics that may be covered are:

- Government code requirements to establish dangerous conditions of public property and the potential defenses and immunities to protect public entities
- Concepts of actual and constructive notice
- Streets and highways code and the adjacent property owner's duty to repair the sidewalk
- Sidewalk ordinances
- Claims perspective on sidewalk issues
- Best sidewalk management practices
- Sidewalk repair processes such as patching, grinding, and saw cutting

The speakers, Chester E. Walls, Esq., and Joseph Ortega, will aim to understand his target audience in attendance and tailor the material them.

Who should attend?

Streets Departments, Maintenance & Operations, City Attorney and Risk Managers

When and where?

April 7, 2026 Northern Region – Tracy, CA
April 8, 2026 Central Region – Atwater, CA
April 9, 2026 Southern Region – Tulare, CA

May 2026

May 21, 2026 - Southern Region – TBD

June 2026

WORKSHOP

James Bourgeois, Praesidium, Inc.

Child Molestation and Abuse Prevention - Protecting Vulnerable Populations

California municipalities serve thousands of youth each day through parks, recreation, libraries, camps, and community programs—creating both tremendous opportunity and significant responsibility. This session equips municipal leaders and program administrators with a practical, risk-focused framework for preventing abuse and responding effectively when concerns arise. Participants will gain insight into the true scope of child sexual abuse, how offenders groom and exploit organizational gaps, how to identify red-flag behaviors in adults and youth, and how to address peer-to-peer sexual misconduct before it escalates. The session also clarifies how to manage allegations—including the realities of false reports—while upholding due process, complying with California mandated reporting laws, and protecting public trust.

Participants will leave with:

- A clear understanding of how abuse occurs in municipal settings and how offenders operate
- Practical tools to identify and intervene on red-flag behaviors early
- Strategies to prevent peer-to-peer sexual misconduct through supervision and environmental safeguards
- Guidance on responding to disclosures, documentation, and mandated reporting requirements
- Actionable steps to strengthen policies, training, and organizational culture to reduce risk

Who should attend?

Any and all individuals either supervising, administering, supporting, or directly working with youth programs.

When and where?

June 16, 2026 - Tracy, CA
June 16, 2026 - Madera, CA
June 17, 2026 - Tulare, CA
June 17, 2026 - Delano, CA
